

KENOTEK

HOW TO USE KENOTEK CARGO 4100

1 Dilute Kenotek Cargo 4100 4:1 with water (four parts water and one part Kenotek).

2 Apply mixed solution to vehicle using snow foam gun/device (if cleaning a larger vehicle you may wish to do one side at a time).

3 Leave the solution to work for 4-5 minutes on the vehicle.

4 Jet wash off the solution using the following technique:

1. Always start at the bottom and work your way up.
2. Jet wash off using a side to side motion (imagine painting a fence panel).
3. Make sure you get all areas of the truck with the jet wash as this is replacing brushing or sponging.

5 Rinse off any excess solution once all dirt is removed.

6 Leave to dry. **DO NOT RUB WITH HANDS OR A CLOTH.**
